

Raj Duggavathi, Department of Animal Science

Statement

I have been the member of the FAES since in 2008 serving to fulfill the McGill missions of research and teaching. Having been the Chair of Animal Science and the user of the farm, I have been keenly aware of the issues of Mac campus and have contributed to the development of potential solutions. The faculty needs a leader who has strong background in agriculture and appreciation for the Quebec agri-environmental sectors. With my strong administrative and committee experiences I can identify the most suitable candidate for the Dean of FAES.

Raj Duggavathi, département de sciences animales
